CHRONOFLOW

HT ROPE DYEING MACHINE

Chronoflow è una macchina per la tintura in corda in alta temperatura (max 144°C).

Con questo progetto ci siamo focalizzati sulla riduzione dei tempi di ciclo, sull'affidabilità estrema, facilità manutentiva e risparmi energetici.

È una macchina a deposito circolare, idonea per tessuti sia a maglia che ortogonali a grammature variabili.

Per articoli di pesi particolarmente leggeri è possibile lavorare in corda doppia o multipla.

Il corpo macchina può contenere da una a sei vasche, con capacità di carica variabile a seconda del modello e dalla versione prescelta.

Considerando una fibra cellulosa a maglia con peso di 250 g/lin.m, le capacità di carica sono quelle indicate in tabella a pag. 6.

Tutte le parti interne della macchina in contatto con il tessuto sono costruite impiegando acciaio inossidabile AISI 316/AISI 316 L certificato.

Chronoflow è interamente ingegnerizzata e costruita in MCS.

Ogni nuovo modello viene testato ed esposto, in INNOVATIVE BLUE AREA integrato nella tintoria del gruppo MCS.

Chronoflow is a high temperature rope dyeing machine (max 144°C).

With this project we focused on reduction on cycle times, extreme reliability, ease of maintenance and energy savings. It is a circular deposit machine, suitable for both knitted and orthogonal fabrics with variable weights.

For particularly light weight items, it is possible to work in double or multiple rope.

The machine body contains from one to six trough, with variable charge capacity depending on the model and the chosen version.

Considering a knitted cellulosic fiber with a weight of 250 g/lin.m, the charge capacities are those indicated in the table on page 6.

All the internal parts of the machine in contact with the fabric are built using certified stainless steel AISI 316/AISI 316 L.

Chronoflow is entirely engineered and built in MCS.

Each new model is tested and exhibited, in INNOVATIVE BLUE AREA integrated in the MCS Group dyeing plant.
