EUROFLOW SPORT

HT ROPE HORIZONTAL DYEING MACHINE

Euroflow Sport es una máquina para teñir cuerdas a alta temperatura (máximo 144°C).

Es una máquina de almacenamiento horizontal-, adecuada para tejidos de punto y ortogonales con gramajes variables , gracias al uso de sistemas de control avanzados.

El cuerpo de la máquina puede estar compuesto por uno o cuatro tubos de diferente capacidad, según el modelo y la versión elegida.

Considerando una fibra celulósica de punto con un peso de 250 g/lin. m, las capacidades de carga son las indicadas en el cuadro de la pág. 6

Todas las partes internas de la máquina en contacto con la tela se fabrican utilizando acero inoxidable AISI 316/AISI 316 L. certificado.

Euroflow Sport está completamente diseñado y construido MCS.

Cada novo modelo é testado e exibido, em INNOVATIVE BLUE AREA integrada na tinturaria do Grupo MCS.

Euroflow Sport is a high temperature rope dyeing machine (max 144 °F).

It is a horizontal-depositing machine, suitable for both knitted and orthogonal fabrics with variable weights, thanks to the use of advanced control systems.

The machine body can be composed of one to four tubes with different capacities , depending on the model and the version chosen.

Considering a cellulosic fibre mesh with a weight of 250 g/lin. m, the filling capacities are those indicated in the table on p. 6

All internal parts of the machine in contact with the fabric are constructed using AISI 316/AISI 316 L. certified stainless steel.

Euroflow Sport is entirely engineered and built in MCS.

Each new model is tested and exhibited, in INNOVATIVE BLUE AREA integrated in the MCS Group dyeing plant.

HT ROPE DYEING MACHINE

MAIN FEATURES

Depósito horizontal cilíndrico con cubeta interior adecuadamente perforada para un transporte perfecto de telas sintéticas o naturales

Enjuague con agua derramada del depósito/cubeta mediante baño o bomba de circulación

Grupo de transporte de la tela que comprende: bobina de arrastre accionada de manera independiente, Hydrovario (sistema de boquilla con apertura ajustable), tubos de transporte modelados para garantizar una marcha perfecta de la tela y un depósito sin tensiones/abrasiones

Succión controlada del baño para evitar las posibles turbulencias locales en la sección perforada de la cubeta

Flotación de la tela dentro de la cubeta del depósito, independiente del baño de fuera de la propia cubeta, lo cual permite un movimiento natural de la tela no afectado por el flujo del baño

Distribución controlada del baño a la parte trasera del depósito para reducir el posible empuje del baño

Depósito lateral para productos, con sondas de nivel neumáticas y mezclador

Depósito VERTICAL para preparación del baño **MST** con sistema para el control / gestión del nivel

Acabado de la máquina: con chorro de arena o tiras

Cylindrical horizontal vessel with inner trough suitably perforated for a perfect transport of synthetic or natural fabrics

Overflow rinse of the vessel/trough by means of liquor circulation pump

Fabric transport group comprising: independently driven dragging reel, Hydrovario (nozzle system with adjustable aperture), shaped transport tubes to grant a perfect fabric run and deposit without tension/abrasion

Controlled liquor suction to avoid possible local turbulence in the perforated section of the trough

Fabric floatation inside the deposit trough, independent of liquor outside the trough itself, thus allowing a natural movement of the fabric unaffected by liquor flow

Controlled liquor delivery to the rear part of the vessel to reduce possible liquor thrust

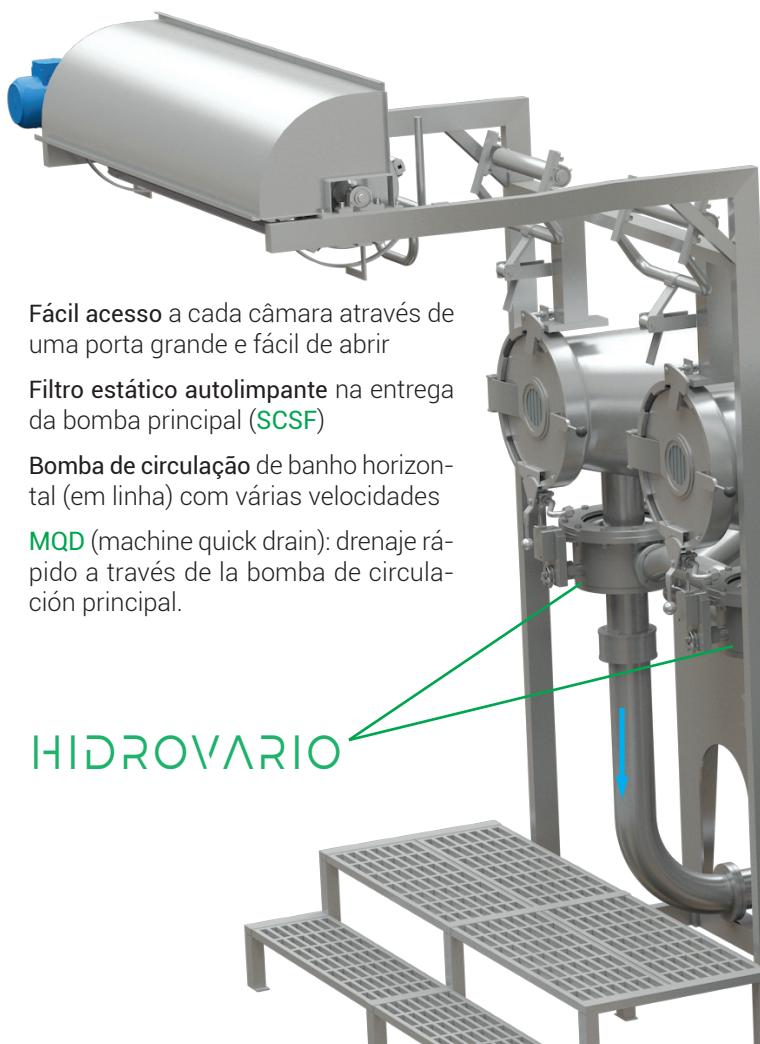

One side tank for products, with pneumatic level probes and mixer

Easy accessibility to each single chamber via a large, easy to open door

Self cleaning static filter in main delivery pump (**SCSF**)

Horizontal circulation pump with variable speed

MQD, machine quick drain, by main circulation pump.
